ABOUT ME

As a software developer with 5+ year of experience in .NET Core, worked in Agile methodologies and all phases of SDLC using .NET Core MVC, C#, EF Core, LINQ, RabbitMQ, JavaScript to developed various functionality in web development. I am constantly learning to expand my skill set and contributing to the software industry. I bring dynamic approach to solve problems. Using efficiently GitHub copilot , Claude in day to-day tasks.

WORK EXPERIENCE

API Developer, AdvantageGo , a Sapiens Company

July 2024- Present

Roles and Responsibilities: (Client – ASPEN, Talbot, CNA Hardy and more)

- Developed end-to-end claim and policy APIs to create data and store into database, deployed microservices to IIS server.
- Worked on PowerShell script, designed and developed the deployment of Microservices that the integrated web API.
- Worked effectively, independently and collaboratively in team to build complex features in Microservices Architecture.
- Documenting the design, code functionality and user interface design in the confluence pages.
- Experienced in Agile methodologies, Scrum and Kanban, Azure board TFS, Confluence etc.

Associate Consultant, Capgemini

Oct 2023- June 2024

Roles and Responsibilities: (Client – Caterpillar)

- Working in web app development using .NET Core, MVC, C#, SQL Server.
- Developed cloning functionality of document module in three-tier architecture. Providing features enhancements in the existing functionality, user interface changes and critical bug fixes.
- Involved in code refactoring or revamping, code merge, code optimization code review and code deployments.
- DevOps/CloudOps - CI/CD Azure pipeline, Setting-up build agent, build pipelines and release the configurations.
- SDLC Practices –Involved in code reviews, code optimization, sprints planning and retrospective.
- Requirements gathering from PMs/PO and changing functional specifications into technical specifications.
- Monitoring and supporting developers related to product and practice the development techniques.

Senior/Software Analyst, Capgemini

Feb 2021- Oct 2023

Roles and Responsibilities: (Client – GE HealthCare)

- Designed and developed a key-vault service to integrate with web app to store and secure the credentials.
- Hands-on knowledge of background job development using Hangfire library and Cron expression.
- Developed the mail reading functionality and generate cash report, centralization of application logs.
- Worked on document generation through web API using syncfusion and libreoffice, templates design using DocuSign tags.
- Worked on email automation using smtp, pop3, and Microsoft Graph package to download .eml files and send report.
- Integration of BOX Drive APIs with web application to maintain consolidated files and folders through code implementation.
- Clouds –Certified in AZ-900 and have knowledge of Azure Fundamentals.
- Good knowledge of relational database i.e., SQL Server, Oracle DB2.
- Maintain coding standards and best practices; provide high quality code, good understanding of SOLID Principle, Design Pattern.
- Assist team members in development and code optimization.

TECHNICAL SKILLS

Backend Languages: C#, .NET Core, .NET 5, .NET 6, .Net Framework, OOPs, ASP.NET MVC, Entity Framework Core, LINQ, Python 3.x

API Design: REST API, Microservices, SOLID, RabbitMQ, Architecture – Clean and Three-tier, Design Principles

Database: SQL Server, DB2

Frontend: HTML, CSS, JavaScript, Bootstrap, Angular

Tools: Visual Studio / Code, SSMS, Postman, SoapUI, Sublime, UiPath, GitHub Copilot, ClaudeCode

DevOps: Azure CI/CD Pipelines, Git VCS, GitHub, NuGet, NPM

Cloud: Azure Functions, Azure Key-Vault, AZ Fundamentals **SDLC Practices:** Agile methodologies – Scrum , Kanban

EDUCATION

ALIGARH MUSLIM UNIVERSITY

Master in Computer Science and Applications, CGPA 8.1

Aligarh, U.P, India

July 2017 - Aug 2020

ACHIVEMENTS & EXTRACURRICULAR ACTIVITIES

•**Student IT Coordinator** in University TPO – Nov 2017 – March 2020 •
JEE Mains Qualifier
